

MEBLE *Wojtek*

Dear customers,

feel the joy of furnishing

Your home should be a perfect reflection of you and your needs.

Your home should be a perfect reflection of you and your needs. You put your whole heart into decorating it, as well as a lot of work and effort. It's very important that you can enjoy arranging your four walls, creating beautiful arrangements, choosing new furniture and searching for original accessories to perfectly complement your dream space. All this is so that you and your loved ones feel at home during cheerful breakfasts at the dining table, evening chats in the living room, or long phone conversations in a comfortable bed.

We find great pleasure in designing new collections that suit the everyday needs of your home. Thanks to cooperation with outstanding, talented designers, and a team of experienced professionals, we see to every detail of production to provide you with the highest-quality furniture.

If you want to have the pleasure of furnishing with us, check out our catalogue and go the website at www.meblewojcik.pl. For even more ideas, inspiration and advice, visit us on Facebook or Instagram, or the Blog 'Jak umeblować i nie zwariować' ('How to furnish without going crazy').

We invite you to read the catalogue!
The Meble Wójcik team

PHOTO: Art School in Gronowo Górne

... a very family-oriented story.

The history of our company dates back to the 80s, when Leszek Wójcik - the senior of the company - founded his own carpentry workshop in Elbląg, in which he began batch production of furniture.

More than 30 years have passed since then. Today, we are one of the most-modern enterprises in the Warmian-Masurian region. We currently have three factories that employ almost 1,500 people. Our furniture goes to 250 stores in Poland and over 30 countries around the world. We owe everything that we have achieved over many years of hard work to the dedication and commitment of the entire Wójcik family, supported by a team of experienced and qualified colleagues.

Our family is our greatest asset, which is why all employees are treated as a part of it. All of this means that our furniture is made from the heart, with great passion, and with the home in mind. For over 30 years of our operations, we have managed to build customer trust by offering them durable, elegant and functional products of a high quality and at an affordable price. We guarantee that our furniture will become an inseparable element of time spent together, and will witness many beautiful moments.

discover the functional side of our furniture

lighting

Meble Wójcik collections are equipped with a wide range of different types of lighting, which can be more than just used in vitrines, or mounted to headboards of beds. Our designers went a step further by creating collections that already have lighting elements in the form of Led strips built into their structure.

glazed sides of vitrines

This is the perfect solution for people who love large furniture, but think it lacks lightness. Thanks to the glazed sides, the vitrines become more delicate. You can also showcase items that have been hidden thus far.

synchronising mechanism table extension

Share a table! Thanks to these guides, you can easily extend the table up to 200cm long by yourself, giving your guests plenty of room to sit, and then effortlessly fold it to regain a lot of space that you need every day.

soft closing of the fronts and drawers

In an apartment, it's not only the look of furniture that counts, but also the comfort of its use. If you like drawers and doors that operate quietly, smoothly and slow down in the last closing phase, look for collections with this sign in our range. No more slamming and not closing!

touch light switch -additional option

Light in an apartment has a big impact on your well-being. Now you can turn it on/off quickly and conveniently simply by tapping a specific spot on the furniture piece. You don't need bunches of cables next to your furniture. This is thanks to an additional, invisible light switch that is mounted from the inside into the body of the furniture piece. Check out how easy it is!

In each collection, we have marked its unique features and functionalities with symbols. If you wish to learn more about them, read the following glossary of terms.

rounded edges

This is an interesting stylistic feature that will help soften the furniture edges, giving it a more delicate and elegant character. However, it's not just about aesthetics, but also about the safety of use, which will certainly attract the attention of families with small children.

full-extension slide

The slide's construction allows the drawer to be pulled out of the furniture body and provides full access to its content. When using full extension slides in drawers, we can organize them better. This is especially important in the case of shallow drawers, where access to the rear part is difficult.

upholstered bedhead

In the bedroom, the most important thing is the bed, which is why it must be comfortable, and not just in terms of the quality of the mattress. A soft and springy upholstered bedhead will allow you to lean back and unwind while reading a book, watching TV or just relaxing.

bed with a raisable frame

This is the perfect solution for those looking for hard-to-find, extra space in an apartment to put their rarely used blankets, extra bedding or seasonal clothing. Our frames are equipped with high-quality hydraulic systems, thanks to which you can easily open and safely close the storage area.

bed drawer - additional sleeping function

A pull-out drawer is a great alternative to bunk beds! It provides an extra place to sleep once you put a mattress in it. If it's no longer needed, you can easily close the drawer, and have more space in your room.

Living room and dining room

the heart of family life.

The living and dining rooms are vibrant places. Dinners with friends, family movie nights or relaxing with a good book - no matter what you're doing, make sure this space is comfortable and cosy.

➔ We advise on how to start planing

Because the living and dining rooms must fulfil many functions, it's important that they are decorated cleverly. If you want to check if all the furniture will fit in the room, just draw it on a piece of paper (using the same scale as your floor plan).

Then, cut them out and arrange them how you like on the plan - remember that you do not have to stick close to your walls. Sometimes, a couch and coffee table set in the middle of the room can be a practical and effective solution!

BODY/FRONT
Oak Artisan, Fresko/Oak Artisan, Fresko

vitrine type AVL01

new AVILES

Unique combination

Gentle metal handle seated in a subtle hollow looks beautifully in the setting of a wooden decor. The classic was deliberately broken by the up-to-date industrial fronts in the „concrete” shade. In addition, some ‚greenery’ in the form of natural plants and beautifully illuminated showcase and the „wow” effect is guaranteed.

Lightweight metal frame

A very fashionable and practical element, which is associated with lofty climates or modern interiors - in our version it is much „softer“. This is due to its combination with delicate design of the Cordoba collection's items and a neutral shade of oak. But that's not all! Black fronts also has a visible, „wooden texture“, which gives a very interesting visual effect and fits perfectly to handles in the same color.

CORTINA

vitrine type CNAV01

traditional and timeless

The warm oak colour, metal, rustic handles, and the large construction of the fronts resemble classic wooden furniture. The glazed sides of the vitrines, which can also be backlit, break with tradition and make the sturdy units visually more delicate. The pleasure of using the furniture is increased by the soft-close mechanism of the drawers and fronts.

Bedrooms

Wonderful mornings at your fingertips!

The bedroom is one of the most important and intimate rooms of the home. This is where your day begins and ends. In the evenings, close your eyes and enjoy the blissful silence, and greet mornings with a smile on your face!

We advise - on how to start planning

The bedroom should be dominated by calm, bright colours - you can paint the walls in these. Why? Pastel shades will help you relax and unwind after a day of hard work. Remember that accessories also contribute to a good aura in the bedroom. A plush rug, blackout curtains, elegant bedding, bedspread and fluffy pillows are perfect - thanks to them, your bedroom will be cosy and warm.

Children's and youth rooms

Where dreams are born.

A children's room is a place for fun, learning and relaxation. It's a space where dreams are born and plans are made. Make your young one's kingdom inspire them to discover the world and make their dreams come true!

We advise - on how to start planning

When starting planning, begin by choosing a colour scheme. In a children's room, it's best to focus on light colours - beiges, pinks, blues, pastels greens and delicate greys. The colours should not be tiring to the eyes or distracting.

Remember that the children's and youth rooms should reflect the passions and likes of the young person. It's their room, so if they want, let them choose the colours, accessories and furniture. You can also do it together - it could be great fun for you!

AMAZON

cabinet type 30, bed type 90, bookcase type 11, corner wardrobe type 21, cabinet type 31, shelf type 61, desk type 81, container type 85

an alternative solution

The bed has a fully extendable drawer, which is an interesting idea. It's the perfect alternative to a bunk bed. The drawer on wheels provides additional sleeping space if you ever need it (it fits a 190x80cm mattress)! And, if you don't see the need, you can always use it as a practical and generous storage compartment.

ANGEL
p. 80

'You are my greatest treasure, I want you to feel happy at home, to develop your passions and fulfill your dreams.'

You don't need a lot of room - just a cot with three adjustable mattress levels and removable rungs, which, thanks to the additional drawer on wheels, is also a practical storage space for baby accessories.

LASER

three front colours to choose from

Chilli Red, Muted Blue or the expressive Dubai Style - choose one of the three colour options of the fronts for each piece, and give your interior a unique character. A cabinet with a blue door and wardrobe with a red drawer? Nothing stands in the way - colours can be combined with each other however you like, because each of them perfectly suits the grey body and basic black-and-white fronts.

girl or boy?

The collection captivates with its calmness and subtlety. The functionally designed pieces will help you arrange a room for both a girl or a boy. The colours have been toned down, and are a perfect background for pink or blue features such as the coloured, roomy recesses and matching modern handles.

you decide!

The bed from the Lilo collection comes in two options. You can choose the option with a practical drawer that serves as an additional place to sleep (it fits a 190x80cm mattress) or the bed with very roomy drawers and high sides, ideal for long evenings of reading.

white is always safe

Who says a baby's room has to be multicolored? Well, that's just the way it is - there are dozens of toys, colourful books, markers, teddy bears, etc. There is a lot going on so sometimes it makes sense to "calm down" this colorful dizziness with a secure, neutral base. Novi collection will surely survive the challenges of changing tastes - matt fronts are perfect for walls in delicate pastel colours as well as for bold, saturated colours and decorations.

interior with character

Recycling wood is a fashionable trend. It will work especially well in a teenager room, whose owner wants to stand out. Tidiness it's not a priority in his head! Hence, spacious drawers and under-bed recesses that provide storage for various objects. What's more, there are no fingerprints on the decor, which resembles raw wooden boards. The "wow" effect will be achieved by a LED lighting panel above the bed with a touch switch.

Additional furniture:

The foyer –your home starts here.

Many family situations happen in the foyer - parting and reuniting, affectionate greetings and farewells. It doesn't matter whether the foyer is big or small, it's worth putting a little effort and heart into designing it, because it's the showcase of your home.

We advise on how to start planning

The foyer - arrange it so that it's functional and spacious. Its design should reflect the colour scheme, style and furniture of the rest of the home. When arranging the foyer, focus on sleek and practical furniture that won't dominate the room. It's also worth having a mirror in which you can „check” yourself before leaving, and that will visually enlarge this space as well. You should also focus on lighting, and find a place you can use to put away everyday shopping or knick-knacks that you return home with.

organised as soon as you

Arrange your foyer with the timeless Cortina collection and you can forget about rushed mornings and frantically searching for keys or your favourite scarf. Put shoes in the cabinet, coats into the roomy closet, and avoid clutter at your doorstep. Hang a mirror that doesn't

just visually enlarge the space, but thanks to the Led backlighting, gives a unique decorative effect. Complete the arrangement with an upholstered bench so that you can put on your shoes comfortably. Enjoy comfort and convenience for many years.

small, but clever

The space you need doesn't always equal the one you have. Remember that even a very small interior can be functionally organised. Use type 111 from the Imperial collection. This compact module will maximise the potential of the room and provide storage space you need every day.

consistent style

Do you like consistency and harmony? Would you like your entry to give a taste of the atmosphere of the rest of your interior? It's now possible, thanks to the wide range of pieces in the Linate collection, including ones for the foyer. A shallow wardrobe designed for a narrow hallway, a hanger with a mirror, a hanging cabinet under which you can put slippers and shoes - this is everything you need to have an elegant and functional hallway.

ADDITIONAL ACCESSORIES

BUTTERFLY LAMP

this is a combination of modern, original design and high-quality workmanship. It has a long, flexible arm and a convenient switch located on the head (in a neutral colour). This lamp features LED diodes and is very versatile, so you can put it on your bed, shelf or desk. The option includes sets with one or two lamps with a power supply and the necessary cabling.

FLEXI LAMP

has a modern and minimalist shape. You can mount it to your bed, desk or shelf. Flexible lamp foot will allow you to freely direct its neutral light color. Thanks to the built-in USB input you can charge your phone or tablet additionally. Optionally, there are kits containing 1 or 2 LED lamps with a power supply and the necessary wiring. The lamp has been awarded for its design and high quality in the prestigious industrial design competition Red Dot Design Awards!

TOUCH LIGHT SWITCH

This is an extremely practical solution, thanks to which you can turn the light on or off quickly and conveniently simply by tapping on a chosen place on your furniture. You don't need messy bunches of cables on the floor. This is thanks to an additional, invisible light switch, which you mount from the inside to the body of the furniture (under the top or to the side). Check out how easy it is!
