

MEBLE *Wojtek*

Dear customers, feel the joy of furnishing

Your home should be a perfect reflection of you and your needs. You put your whole heart into decorating it, as well as a lot of work and effort. It's very important that you can enjoy arranging your four walls, creating beautiful arrangements, choosing new furniture and searching for original accessories to perfectly complement your dream space. All this is so that you and your loved ones feel at home during cheerful breakfasts at the dining table, evening chats in the living room, or long phone conversations in a comfortable bed.

We find great pleasure in designing new collections that suit the everyday needs of your home. Thanks to cooperation with outstanding, talented designers, and a team of experienced professionals, we see to every detail of production to provide you with the highest-quality furniture.

If you want to have the pleasure of furnishing with us, check out our catalogue and go the website at www.meblewojcik.pl. For even more ideas, inspiration and advice, visit us on Facebook or Instagram, or the Blog 'Jak umeblować i nie zwariować' ('How to furnish without going crazy').

We invite you to read the catalogue!

... a very family-oriented story.

The history of our company dates back to the 80s, when Leszek Wójcik - the senior of the company - founded his own carpentry workshop in Elbląg, in which he began batch production of furniture.

More than 30 years have passed since then. Today, we are one of the most-modern enterprises in the Warmian-Masurian region. We currently have three factories that employ almost 1,500 people. Our furniture goes to 250 stores in Poland and over 30 countries around the world. We owe everything that we have achieved over many years of hard work to the dedication and commitment of the entire Wójcik family, supported by a team of experienced and qualified colleagues.

Our family is our greatest asset, which is why all employees are treated as a part of it. All of this means that our furniture is made from the heart, with great passion, and with the home in mind. For over 30 years of our operations, we have managed to build customer trust by offering them durable, elegant and functional products of a high quality and at an affordable price. We guarantee that our furniture will become an inseparable element of time spent together, and will witness many beautiful moments.

discover the functional side of our furniture

lighting

Meble Wójcik collections are equipped with a wide range of different types of lighting, which can be more than just used in vitrines, or mounted to headboards of beds. Our designers went a step further by creating collections that already have lighting elements in the form of Led strips built into their structure.

glazed sides of vitrines

This is the perfect solution for people who love large furniture, but think it lacks lightness. Thanks to the glazed sides, the vitrines become more delicate. You can also showcase items that have been hidden thus far.

synchronising mechanism table extension

Share a table! Thanks to these guides, you can easily extend the table up to 200cm long by yourself, giving your guests plenty of room to sit, and then effortlessly fold it to regain a lot of space that you need every day.

soft closing of the fronts and drawers

In an apartment, it's not only the look of furniture that counts, but also the comfort of its use. If you like drawers and doors that operate quietly, smoothly and slow down in the last closing phase, look for collections with this sign in our range. No more slamming and not closing!

touch light switch - additional option

Light in an apartment has a big impact on your well-being. Now you can turn it on/off quickly and conveniently simply by tapping a specific spot on the furniture piece. You don't need bunches of cables next to your furniture. This is thanks to an additional, invisible light switch that is mounted from the inside into the body of the furniture piece. Check out how easy it is!

rounded edges

This is an interesting stylistic feature that will help soften the furniture edges, giving it a more delicate and elegant character. However, it's not just about aesthetics, but also about the safety of use, which will certainly attract the attention of families with small children.

gloss fronts

This is a brilliant look that makes the furniture feel lighter and more delicate. Combined with the colour white, they optically enlarge the room, and when used in dark furniture, they endow elegance. We achieved amazing smoothness of the surface by using high quality furniture foils that are stuck to the fronts made of MDF or laminated board. Thanks to this, the quality of the gloss means you can enjoy a designer effect for a long time.

upholstered bedhead

In the bedroom, the most important thing is the bed, which is why it must be comfortable, and not just in terms of the quality of the mattress. A soft and springy upholstered bedhead will allow you to lean back and unwind while reading a book, watching TV or just relaxing.

bed with a raisable frame

This is the perfect solution for those looking for hard-to-find, extra space in an apartment to put their rarely used blankets, extra bedding or seasonal clothing. Our frames are equipped with high-quality hydraulic systems, thanks to which you can easily open and safely close the storage area.

bed drawer - additional sleeping function

A pull-out drawer is a great alternative to bunk beds! It provides an extra place to sleep once you put a mattress in it. If it's no longer needed, you can easily close the drawer, and have more space in your room.

Living room and dining room the heart of family life

The living and dining rooms are vibrant places. Dinners with friends, family movie nights or relaxing with a good book - no matter what you're doing, make sure this space is comfortable and cosy.

WE ADVISE ON HOW TO START PLANNING

Because the living and dining rooms must fulfil many functions, it's important that they are decorated cleverly. If you want to check if all the furniture will fit in the room, just draw it on a piece of paper (using the same scale as your floor plan). Then, cut them out and arrange them how you like on the plan - remember that you do not have to stick close to your walls. Sometimes, a couch and coffee table set in the middle of the room can be a practical and effective solution!

new **CORTINA**

BODY AND FRONT
Grandson Oak

traditional and timeless

The warm oak colour, metal, rustic handles, and the large construction of the fronts resemble classic wooden furniture. The glazed sides of the vitrines, which can also be backlit, break with tradition and make the sturdy units visually more delicate. The pleasure of using the furniture is increased by the soft-close mechanism of the drawers and fronts.

LYON LIGHT

convenient use

The charming combination of white gloss fronts with the warm colour of Oak Riviera is not the only asset of the collection. It's also worth noting the soft-close runners and hinges, as well as the laminated board used on the tops that has increased resistance to scratching and high temperatures.

LYON DARK

an interior with character

For fans of dark furniture who'll appreciate the bold combination of grey and graphite, a second version of Lyon was created. The same geometric structure, but with the addition of cool Led lighting that's perfect for more stark and minimalist interiors.

SHETLAND

sturdy pieces

The natural shade of wood with a trendy horizontal grain contrasts the graphite recesses perfectly. The simplicity of the furniture, enclosed in a large body made of laminated board, means that furniture from the Shetland collection will always look great and work well in almost any arrangement - from loft apartments to warm, cosy interiors. If you get bored with the current colour, all you have to do is change the accessories or paint the walls - the choice is yours!

Bedrooms

wonderful mornings at your fingertips!

The bedroom is one of the most important and intimate rooms of the home. This is where your day begins and ends. In the evenings, close your eyes and enjoy the blissful silence, and greet mornings with a smile on your face!

WE ADVISE ON HOW TO START PLANNING

The bedroom should be dominated by calm, bright colours - you can paint the walls in these. Why? Pastel shades will help you relax and unwind after a day of hard work.

Remember that accessories also contribute to a good aura in the bedroom. A plush rug, blackout curtains, elegant bedding, bedspread and fluffy pillows are perfect - thanks to them, your bedroom will be cosy and warm.

Children's and youth rooms where dreams are born

A children's room is a place for fun, learning and relaxation. It's a space where dreams are born and plans are made. Make your young one's kingdom inspire them to discover the world and make their dreams come true!

WE ADVISE ON HOW TO START PLANNING

When starting planning, begin by choosing a colour scheme. In a children's room, it's best to focus on light colours - beiges, pinks, blues, pastels greens and delicate greys. The colours should not be tiring to the eyes or distracting.

Remember that the children's and youth rooms should reflect the passions and likes of the young person. It's their room, so if they want, let them choose the colours, accessories and furniture. You can also do it together - it could be great fun for you!

Additional furniture:

the foyer – your home starts here

Many family situations happen in the foyer - parting and reuniting, affectionate greetings and farewells. It doesn't matter whether the foyer is big or small, it's worth putting a little effort and heart into designing it, because it's the showcase of your home.

WE ADVISE ON HOW TO START PLANNING

The foyer - arrange it so that it's functional and spacious. Its design should reflect the colour scheme, style and furniture of the rest of the home. When arranging the foyer, focus on sleek and practical furniture that won't dominate the room. It's also worth having a mirror in which you can „check“ yourself before leaving, and that will visually enlarge this space as well. You should also focus on lighting, and find a place you can use to put away everyday shopping or knick-knacks that you return home with.

organised as soon as you

Arrange your foyer with the timeless Cortina collection and you can forget about rushed mornings and frantically searching for keys or your favourite scarf. Put shoes in the cabinet, coats into the ro-

om-y closet, and avoid clutter at your doorstep. Hang a mirror that doesn't just visually enlarge the space, but thanks to the Led backlighting, gives a unique decorative effect. Complete the arrangement with an upholstered bench so that you can put on your shoes comfortably. Enjoy comfort and convenience for many years.

small, but clever

The space you need doesn't always equal the one you have. Remember that even a very small interior can be functionally organised. Use type 111 from the Imperial collection. This compact module will maximise the potential of the room and provide storage space you need every day.

consistent style

Do you like consistency and harmony? Would you like your entry to give a taste of the atmosphere of the rest of your interior? It's now possible, thanks to the wide range of pieces in the Linate collection, including ones for the foyer. A shallow wardrobe designed for a narrow hallway, a hanger with a mirror, a hanging cabinet under which you can put slippers and shoes - this is everything you need to have an elegant and functional hallway.

hanger type 115, mirror type 121, hanging cabinet type 67, wardrobe type 20

ADDITIONAL ACCESSORIES

BUTTERFLY LAMP

This is a combination of modern, original design and high-quality workmanship. It has a long, flexible arm and a convenient switch located on the head (in a neutral colour). This lamp features LED diodes and is very versatile, so you can put it on your bed, shelf or desk. The option includes sets with one or two lamps with a power supply and the necessary cabling.

FLEXI LAMP

This is a combination of modern, original design and high-quality workmanship. It has a long, flexible arm and a convenient switch located on the head (in a neutral colour). This lamp features LED diodes and is very versatile, so you can put it on your bed, shelf or desk. The option includes sets with one or two lamps with a power supply and the necessary cabling.

TOUCH LIGHT SWITCH

This is an extremely practical solution, thanks to which you can turn the light on or off quickly and conveniently simply by tapping on a chosen place on your furniture. You don't need messy bunches of cables on the floor.

This is thanks to an additional, invisible light switch, which you mount from the inside to the body of the furniture (under the top or to the side). Check out how easy it is!
